The High Energy Theory Group at the State University of New York at Buffalo (UB) invites applications for a postdoctoral position in Theoretical Particle Physics starting in September 2010. The activities of the group include QCD and Electroweak phenomenology, in particular higher order corrections and tests of the Standard Model, and new physics at the electroweak scale (supersymmetry, extra dimensions, etc.). Current faculty members of the group are Ulrich Baur, Richard Gonsalves, and Doreen Wackeroth. Close collaboration exists with the High Energy Experimental (DØ and CMS) and Cosmology groups at UB, and the Particle Theory Group of the University of Rochester. More information about the group can be found at [www.physics.buffalo.edu/hepcos](http://www.physics.buffalo.edu/hepcos).

Applications, including a list of publications, CV, and three letters of recommendation should be made available electronically via the website [academicjobsonline.org](http://academicjobsonline.org).

Deadline for applications is January 15, 2010. For questions please contact Professor Ulrich Baur via email to baur@ubhex.physics.buffalo.edu.

We especially welcome applications from qualified members of protected groups. The University at Buffalo is an Equal Opportunity Employer/Recruiter.
